INDEX

ACTIVATION of starfish eggs, as influenced by cyanide and oxygen lack, 288.
Alternation of generations, in Lecane inermis Bryce, 345.
Ammonium salts, permeability of Arbacia egg to, 171.
Amphibian metamorphosis, 11.
Arbacia egg, effect of fatty acid buffer systems on apparent viscosity, 132.
——— ———, permeability to ammonium salts, 171.
——— ———, permeability to non-electrolytes, 152.
——— ———, unfertilized, oxygen tension-oxygen consumption curve, 242.
Artificial parthenogenesis, production of normal embryos by, in Urechis, 187.

BASAL plate of tail, rôle of, in regeneration in tail-fins of fishes, 60.
BUCHANAN, J. WILLIAM. Modification of the rate of oxygen consumption by changes in oxygen concentration in solutions of different osmotic pressure, 309.

CARASSIUS, rôle of basal plate of tail in regeneration in tail-fins, 60.
Cell permeability to ions, illustrated in Arbacia egg, 132.
——— ———, to water, as affected by urethanes, 72.
Cells, oxygen diffusion into, 245.
Chaetopterus, determination of surface tension of eggs, 67.
Cobra venom, resistance of fourteen species of Protozoa to, 64.
Cortical change, conduction of, at fertilization in starfish egg, 23.
Crotalus atrox venom, resistance of fourteen species of Protozoa to, 64.
Culture medium, modifications of, effect on longevity and fecundity of Proales sordida, 30.
Cyanide, influence on activation of starfish eggs, 288.

DERMAL plicae formation in Rana pipiens, 11.
Desiccation, changes during, in body and organs of leopard frog, 80.
Domestic fowl, sex ratio, 124.
DUNIHUE, F. W. *See* Stunkard and Dunihue, 179.

EMBRYOS, normal, production in Urechis by artificial parthenogenesis, 187.
Erythrocyte, osmotic properties, 95.
Euglena leucops, nuclear division, 327.

FALK, I. S. *See* Gerard and Falk, 213.
Fatigue in muscle and its bearing on ion antagonism, 382.
Fatty acid buffer systems, effect on apparent viscosity of Arbacia egg, 132.
Fecundity of Proales sordida, as affected by modifications of culture medium, 30.
Fertilization in starfish egg, conduction of cortical change, 23.
Fiona marina, pigment of, 120.
Fowl, sex ratio in relation to antecedent egg production and inbreeding, 124.
Fundulus, rôle of basal plate of tail in regeneration in tail-fins, 60.
Fundulus heteroclitus, effect of temperature changes on pulsations of isolated scale melanophores, 269.

GATENBY, BRONTË. Note on Dr. Jan Hirschler's paper on spindle bridges, and the de novo origin of moth spermatocyte Golgi bodies, 409.
GELLHORN, E. Permeability and fatigue in muscle and its bearing on the problem of ion antagonism, 382.
——— ———. The recovery contracture in muscle; a new general salt effect, 397.
GERARD, R. W. Observations on the metabolism of Sarcina lutea, II, 227.
——— ———. Oxygen diffusion into cells, 245.
GERARD, R. W. and I. S. FALK. Observations on the metabolism of Sarcina lutea, I, 213.
Golgi bodies, of moth spermatocytes, de novo origin, 409.

HELFF, O. M. Studies on amphibian metamorphosis, IX. Integumentary specificity and dermal plicae formation in the anuran, Rana pipiens, 11.
Hemolysis, as influenced by pH, temperature and oxygen tension, 95.
HOWARD, EVELYN. The effect of fatty acid buffer systems on the apparent viscosity of the Arbacia egg, with especial reference to the question of cell permeability to ions, 132.
Hydrogen ion concentration, influence on hemolysis, 95.

INBREEDING in domestic fowl, in relation to sex ratio, 124.
Integumentary specificity in Rana pipiens, 11.
Ion antagonism, and permeability and fatigue in muscle, 382.

JACKSON, C. M. *See* Smith and Jackson, 80.
JACOBS, M. H. and ARTHUR K. PARPART. Osmotic properties of the erythrocyte. II. The influence of pH, temperature, and oxygen tension on hemolysis by hypotonic solutions, 95.
JULL, MORLEY A. The sex ratio in the domestic fowl in relation to antecedent egg production and inbreeding, 124.

KROPP, BENJAMIN. The pigment of Velella spirans and Fiona marina, 120.

LECANE inermis Bryce, life histories of sexual and non-sexual generations, 345.
LILLIE, RALPH S. Influence of cyanide and lack of oxygen on the activation of starfish eggs by acid, heat and hypertonic sea-water, 288.
Longevity, in Proales sordida, as influenced by modifications of culture medium, 30.
LUCKÉ, BALDUIN. The effect of certain narcotics (urethanes) on permeability of living cells to water, 72.
LYNCH, RUTH S. and HELEN B. SMITH. A study of the effects of modifications of the culture medium upon length of life and fecundity in a rotifer, Proales sordida, with special relation to their heritability, 30.

METABOLISM of Sarcina lutea, 213, 227.
Metamorphosis, amphibian, 11.
MILLER, HELEN MAR. Alternation of generations in the rotifer Lecane inermis Bryce. I. Life histories of the sexual and non-sexual generations, 345.
Moth spermatocyte Golgi bodies, de novo origin, 409.
Muscle, permeability and fatigue in, and problem of ion antagonism, 382.
——, recovery contracture in, new general salt effect, 397.

NABRIT, S. MILTON. The rôle of the basal plate of the tail in regeneration in the tail-fins of fishes (Fundulus and Carassius), 60.
Non-electrolytes, permeability of Arbacia egg to, 152.
Nuclear division of Euglena leucops, sp. nov., 327.

OSMOTIC properties of the erythrocyte, 95.
Oxygen consumption, modification of rate by changes in oxygen concentration in solutions of different osmotic pressure, 309.
—— diffusion into cells, 245.
—— lack, influence on activation of starfish eggs, 288.
—— tension, influence on hemolysis, 95.
—— ——, oxygen consumption curve of unfertilized Arbacia eggs, 242.

PARPART, ARTHUR K. *See* Jacobs and Parpart, 95.
Parthenogenesis, artificial, production of normal embryos by, in Urechis, 187.
Permeability and fatigue in muscle, 382.
—— of Arbacia egg to ammonium salts, 171.
—— of Arbacia egg to non-electrolytes, 152.

—— of living cells to water, effect of urethanes, 72.
PHILPOTT, C. H. Relative resistance of fourteen species of Protozoa to the action of Crotalus atrox and Cobra venoms, 64.
Pigment of Velella spirans and Fiona marina, 120.
Proales sordida, effects of modifications of culture medium on length of life and fecundity, 30.
Protein synthesis, 1.
Protozoa, resistance to action of Crotalus atrox and Cobra venoms, 64.
Pulsations of isolated scale melanophores of Fundulus heteroclitus, as influenced by temperature changes, 269.

RANA pipiens, changes during desiccation and rehydration in body and organs, 80.
—— ——, integumentary specificity and dermal plicae formation, 11.
Recovery contracture in muscle, 397.
Regeneration of tail-fins of fishes, rôle of basal plate of tail, 60.
Rehydration, changes during, in body and organs of leopard frog, 80.
Resistance of Protozoa to action of Crotalus atrox and Cobra venoms, 64.

SARCINA lutea, metabolism, 227.
Sex ratio in domestic fowl in relation to antecedent egg production and inbreeding, 124.
